

Today's [Jamendo](#) pick comes from [Pornophonique](#) of Germany.

Their song "Sad Robot" comes from "[8-bit lagerfeuer](#)" album which was debuted in Sept. '07.

Kinda weird music supported by 8 bit video game sounds. First of all when set up your player and hit the play button Pornophonique sounds a little bit stranger. After 2 to 3 minutes you'll begin to get used with them. Perfect fit! Look their tags: "electro, rock, 8bit, pop, game, gameboy, videogame, acoustic guitar, fun" again perfect fit. Whole album is worth to listen...
